Inspiration

This is the word that can best describe our enthusiasm for creating products that will be shown in the following pages. It has been twenty five years since I founded FAVORIT which has grown from a small family manufacture to what it is today. All the knowledge, all the skills and the best components known by the SPA world today have been woven into our SPA bathtubs.

INSPIRACIJA

Upravo bi se takvom odrednicom mogao najbliže opisati naš zanos kreiranja i stvaranja proizvoda koji slede na stranicama. Dvadeset pet godina je prošlo od kada sam osnovao FAVORIT koji je iz malene porodične manufakture narastao do ovoga sto sada jeste. U našim SPA kadama, a na stranicama koje slede, utkano je svo znanje, sve veštine, i najbolje komponente koje svet SPA prizvoda danas poznaje.

Without

compro

promise...

This would be our second term of reference. Yes, creating our SPA product line without compromise we have dealt with the most common issues related to a product: issues about quality, usage, practicality, substantiality and the relationship with our customers in post sale service. After two and a half decades, we have given ourselves the freedom to continue creating for you with inspiration and without compromise.

But, since I believe that everything should start from the beginning, please turn the next page of this catalogue towards new twenty five years together!

Enjoy yourselves!

Bez kompromisa... bi bila naša druga odrednica. Da, kreirajući našu SPA liniju proizvoda bezkompromisno smo se vodili odnosom prema najčešćim pitanjima vezanim za neki proizvod. Pitanjima kvaliteta, upotrebljivosti, praktičnosti, sadržajnosti, odnosom prema našim kupcima u postprodaji-servisu. Dali smo sebi slobodu, nakon prve dve i po decenije, da beskompromisno i nadahnuto stvaramo i proizvodimo za Vas i dalje.

Ali posto u svemu cenim treba krenuti od početka, okrenite stranu ovoga kataloga ka novih zajednickih dvadeset pet godina pred nama!

Uživajte!

How Is It Created?

cutting-edge Equipment

Our SPA bathtubs are constructed by cutting-edge machinery used in treatment and processing of so called king-size formats of acrylic sheets. With its 250 kW of installed power, and computerised surveillance, it guarantees that the 8mm-thick SPA acrylic sheet will transform its shape from flat to the exact shape of your SPA model. Furthermore, the molecular structure of the acrylic material will not change, which is very important for its durability and resistance to various weather conditions.

O P R E M A

Naše SPA kade prizvedene su na najmodernijoj mašini kakva se koristi u tretmanu i preradi tzv. king sajz formata akrilnih ploča, iz kojih se proizvode SPA kade. Sa svojih 250kw instalisane snage te kompjuterski nadziranog rada, ona garantuje da će SPA Akrilna ploča debljine 8mm preći iz ravnog u oblik baš Vašeg SPA modela. A da pri tome sam Akrilni materijal neće pretrpeti promene u svojoj molekulskoj strukturi-rešetki, što je veoma bitno za postojanost i dugotrajnost usled izloženosti najrazličitijim vremenskim prilikama koje vladaju na otvorenom.

Roller-coaster machine

Completely automated, indispensable for creating spherical and arched shapes of our bathtub linings with a whole set of radii, or the bearing structure of our SPA model, for instance model EDEN with its millimetre precision.

ROLLER-KOSTER VALJAK MAŠINA

Potpuno automatizovana, i tako neophodna kada su u pitanju sferni oblici. Konkretno obloge naših kada u radijusima, ili sama nosiva konstrukcija modela EDEN sa preciznošću na mm nivou.

Spray-Up

Precisely guided by an operator, it will spray out exactly the amount of polyester needed and that with the components and temperature pre-prepared. This part of the production process will make your bathtub hard and resistant to twisting throughout its entire exploitation life.

SPRAY-UP

Vođen preciznom rukom operatera, izbacije tačno potrebnu količinu poliestera i to sa komponentama i temperaturom predpripremljenog. Ovaj deo proizvodnog procesa učiniće Vašu kadu čvrstom i otpornom na uvijanja, kroz njen čitav životni vek.

Poly-Stone

A completely new trend in lamination and making SPA bathtubs stronger is already in our plant. Robotic arm, computer-controlled, meticulously puts on layer by layer of the new material, Poly-Stone.

POLY-STONE

Potpuno novi trend u laminaciji i ojačavanju SPA kada, već je u našem pogonu. Robotska ruka, kojom rukovodi kompjuter, milimetarski precizno nanosi sloj po sloj novoga materijala Poly-stone.

endur

Material

Our SPA bathtub must be resistant to all weather conditions: the sun, the rain, the snow, and various kinds of radiation: UV, IR, UVB. Then there is water and chemical compounds present in the water that comes into contact with a SPA bathtub. We also take into consideration temperature changes ranging from -20°C to +50°C. All these above-mentioned factors can influence the quality and exterior of a SPA bathtub. Therefore, the exterior of our bathtubs is made of special SPA acrylic sheets that are definitely resistant to all previously mentioned factors. We supply them from the famous Austrian manufacturer SENOPLAST.

MATERIJAL

Naša SPA kada mora postojano podnosi sve vremenske prilike kako sunce, kišu, sneg kao i različite vrste zračenja UVA, IR, UVB. Zatim na red dolazi voda, i hemijska jedinjena koja su prisutna u istoj a pri upotrebi SPA kade. Potom temperaturne promene u spektru od -20 do +50°C. Svi prethodni pobrojani činioci prvenstveno napadaju lice naše SPA kade. A njega čini Akrilna ploča, i to ne bilo kakva, već specijalna SPA akrilna ploča čuvenog Austrijskog proizvođača i našeg dobavljača SENOPLAST Austrija. Ona se bez bojazni nosi sa svim prethodno pobrojanim faktorima.

SPA Control

Electronic control of work represents the "brain" of each SPA bath. Guided by desire to make the use simple, intuitive and at the same time of good quality and long-lasting, we decided on Waterway electronic components. This USA product is entirely made on American soil, and it is the result of many years of work and the commitment of engineers and employees of the Waterway to monitor each component individually with continuous development and dictating trends.

SPA KONTROLA

Elektronska kontrola rada predstavlja „mozak“ rada svake SPA kade. Vodenim željom da korišćenje učinimo jednostavnim, intuitivnim i pri tome kvalitetnim i dugotrajnim odlučili smo se za Waterway elektronske komponente. Ovaj SAD proizvod u potpunosti izrađen na Američkom tlu, plod je višegodišnjeg rada i posvećenosti inžinjera i zaposlenih Waterway-a ka praćenju svake komponente ponaosob uz stalni razvoj, te diktiranje trendova.

PUMP

SILENT
BOWLER

HYDRO
PUMP

2

SPA Hydro pump

If we say that electronics is the brain of every SPA bath, then its PUMPS are undoubtedly the heart of the same. And that is why we decided on Waterway pumps for this component. The uncompromising American product with exceptional performance characteristics, guarantees long-term use. High flow power with 2 or 3 HP with economical power consumption and SILENT characteristics, is a winning combination.

HIDRO PUMPA

Ukoliko za elektroniku kažemo da je mozak rada svake SPA kade, onda njene pumpe predstavljaju bez sumnje srce iste. I zato smo se i kod ovoga sastavnog dela odlučili za Waterway pumpe. Beskompromisni Američki proizvod, sa izuzetnim karakteristikama garant je dugotrajnoj eksploataciji. Velika protočna moć uz 2 ili 3KS, ekonomičnost u potrošnji električne energije i SILENT karakteristika dobitna je kombinacija.

SPA Aero pump

The high-power Aero pump, with an integrated thermal component, supplies each AIR jet individually with heated air. This is very important from the aspect of comfort and energy consumption for heating water. In addition, this our component is also with SILENT certificate.

3

SILENT
BOWLER

AERO
PUMP

AERO PUMPA

Aero pumpa velike snage, sa integrисаном термо компонентом снабдева сваку Aero млазницу понаособ, загрјаним ваздухом. А то је веомабитно са аспекта конфора коришћења и утрошка енергије за загревање воде. При томе је и ова наша компонента са SILENT сertifikatom.

SILENT
BOWLER

CIRCULATION
PUMP

4

SPA Circular pump

The Circular pump is one of the rare parts before which the demand for continuous operation is set. The whole mass of water, thanks to it, runs non-stop through filters and heaters and makes our SPA bath attractive for use and enjoyment. That is the reason why we also gave the trust to Waterway.

CIRKULACIONA PUMPA

Cirkularna pumpa је један од ретких делова пред који је постављен захтев за непрекидни рад. Сва маса воде се зahvaljujući njoj non stop покреће преко филтера и грејача и чини нашу SPA каду привлачном за коришћење уз уживање. Те smo zato i ovde poverenje poklonili Waterway-u.

WATER PURIFICATION

5

SPA UV Lamp

UV lampa is an indispensable part of the equipment for clean and correct water in the SPA bath. UV rays will take care of a wide variety of bacteria that could be regular guest in the water without them.

UV LAMPA

UV lampa nezaobilazan je deo opreme za cistu i ispravnu vodu u SPA kadi. UV zraci ce se postarat za sirok spektar bakterija, koje bi bez njega mogle bile redovni gost u vodi.

SPA Ozone generator

6

The Ozone generator from the intake air from the surrounding environment will compress oxygen and transform it into OZON. It will expand through all components to the farthest corner and make the water crystal clear and bacteria perfectly flawless. With its imperceptible but valuable work, the Ozon generator makes every use of our SPA bath stay in a perfect memory.

OZON GENERATOR

Ozon generator iz usisanog vazduha iz okolne sredine kompresovaće kiseonik ta ga transformisati u OZON. A on će se putem svih sastavnih delova proširiti i do najudaljenijeg kutka i učiniti da voda ostane kristalno čista i bakterijski besprekorno ispravna. Svojim neprimetnim, ali vrednim radom Ozon generator čine da svako korišćenje naše SPA kade bude u lepom sećanju.

7

SPA Antibacterial filter

An Antibacterial Filter with active carbon. These very fine filter perforations are a physical dam for everyday products (leaves, grass, fine physical impurities) from the surrounding environment which are found during the day on the "water mirror" of our bath.

ANTIBAKTERIJSKI FILTER

Antibakterijski filter sa aktivnim ugljem te veoma sitne filterske perforacije fizička je brana svakodnevnim produktima (lišće, trava, sitne fizičke nečistoće) iz okolne sredine, a koji se tokom dana nađu na „vodenom ogledalu“ naše kade.

Uložak

Dyna filter

8 SPA Hydro & Aero jets

Hydro and aero jets as well as commands. Here, we also decided that our choice would be made by Waterway. Resistant to all weather conditions with years and years of use. Sounds simple just at first glance. Because the jets and commands represent something that is directly in contact with us and they must be of high quality, but at the same time they must be aesthetic decoration of the bath.

Hydro and aero jets kombo series by Waterway are the top of the world SPA offer. Nothing so far has been seen to spin so easily and cheerfully through the water, contributing to the experience of the massage being unrivaled and the visual effects of water movement are difficult to describe. Simply, it has to be tried because our pumps only show their full power with an almost silent operation of this kind of configuration. Incredibly good is maybe the best description.

COMBO

HYDRO

MAGMA

COMBO Hidro i aero jetovi

Hidro i aero jetovi te komande i ovde smo se odlučili za made by Waterway otporni na sve vremenske prilike uz godine i godine korišćenja. Zvuči jednostavno, samo na prvi pogled. Jer jetovi i komande predstavljaju nešto što je direktno u kontaktu sa nama, i moraju da budu veoma kvalitetni a pri tome i estetski ukras kade.

Hydro i aero jetovi kombo serije by Waterway su sam vrh svetske SPA ponude. Ništa do sada viđeno se tako lako i veselo ne vrti kroz vodu, doprinoseći da iskustvo masaže bude bez premca, a vizuelni efekti kretanja vode teški za opisati. Jednostavno, to se mora probati jer naše pumpe tek sa njima pokazuju svu svoju moć uz skoro pa potpuno tih rad čitave ovakve konfiguracije. Neverovatno dobro je možda najbolja odrednica.

SPA Heater 9

The 3 KW HEATER is fully integrated into the electronic box and it is programmable at a level of 0.5 °C.

GREJAČ snage 3kw u potpunosti je integriran u elektronski box. Te je programabilan na nivou od 0,5 °C.

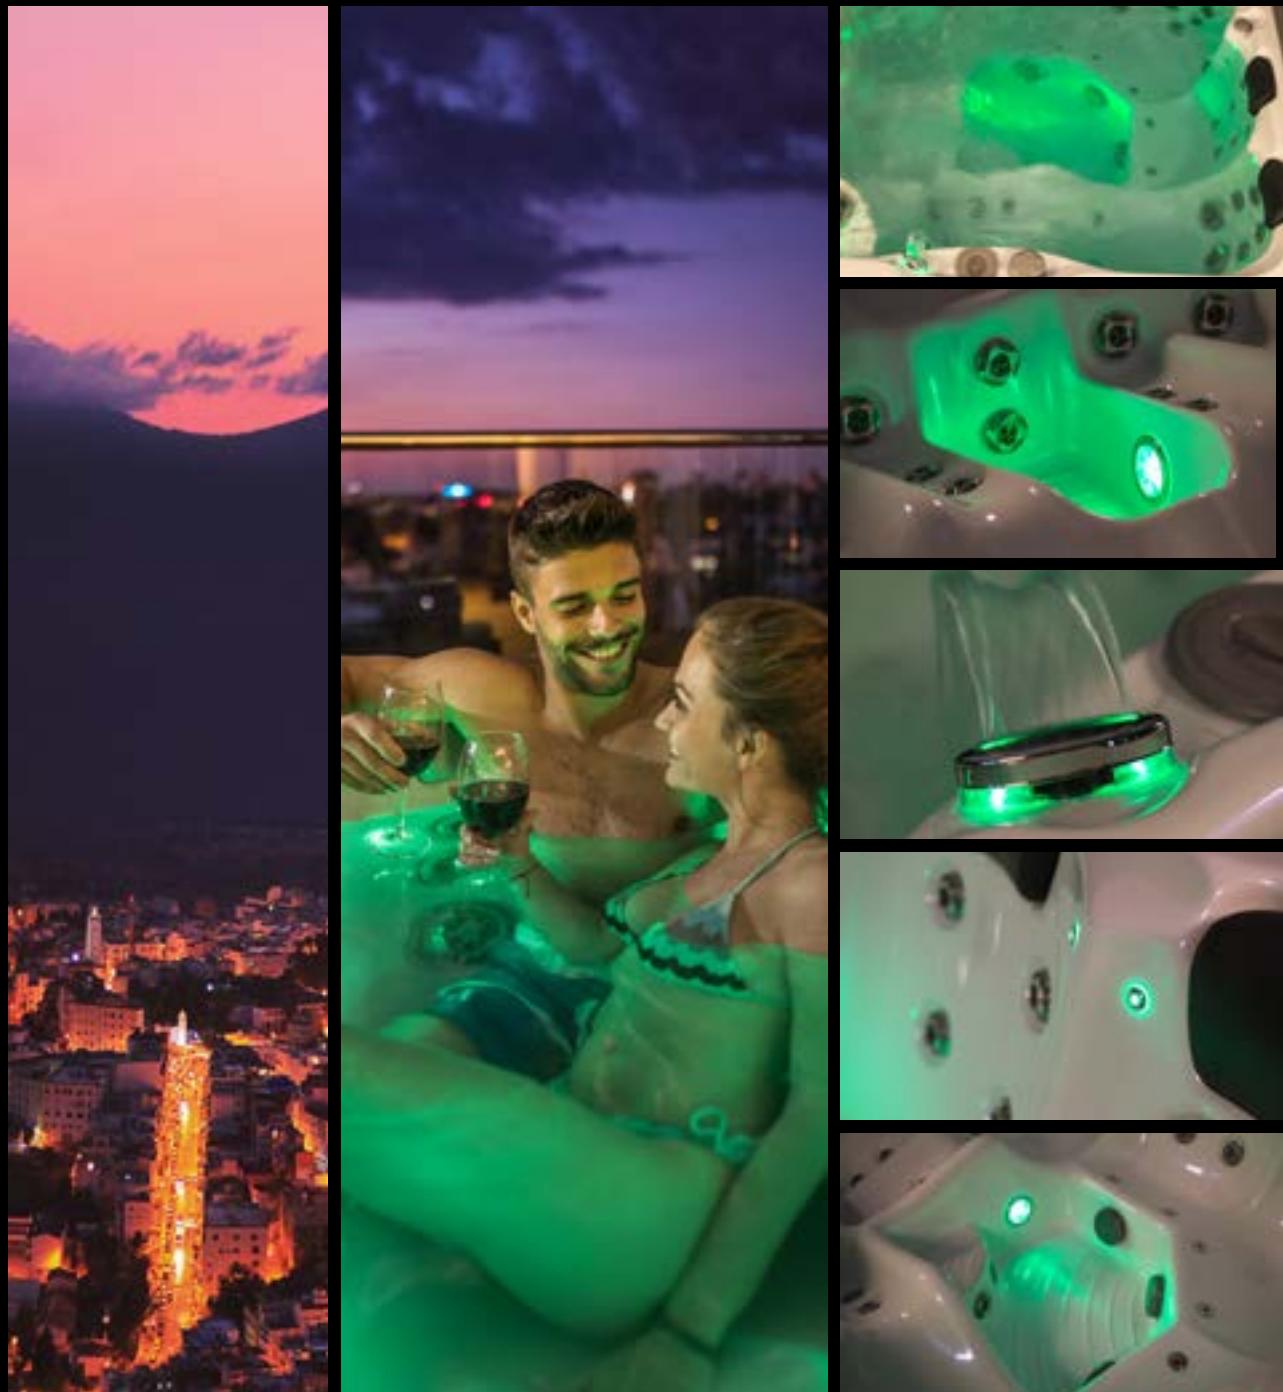

10 Chromotherapy

CHROMOTHERAPY - Since ancient times, the positive experience of light to our organism has been known. A very powerful spectrum of colour and strength will make an unusual game of bubbles and colours in front of your eyes.

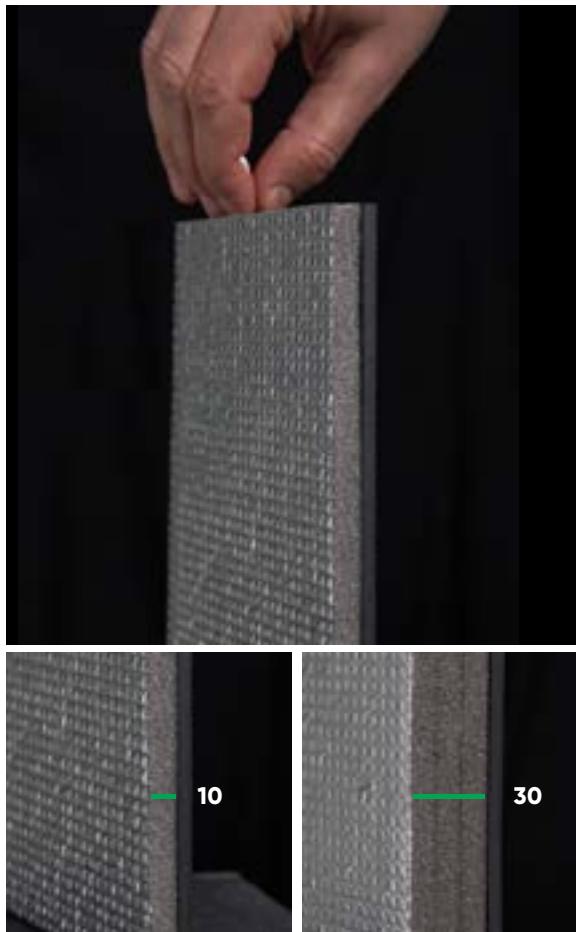

LED MINI LAMPS - Elegance in its splendid quality of manufacturing with chrome ring. The best recommendation is to use it in combination with CHROMOTHERAPY.

HROMOTERAPIJA – Od davnina je poznato pozitivno iskustvo svetlosti na naš organizam. Veoma moćan spektar boja i snage učiniće pred našim očima neverovatnu igru mehurića i boja.

LED MINI LAMPE – Elegancija u svoj raskoši kvaliteta izrade, sa hromiranim prstenom. Najbolja je preporuka za korišćenje u kompletu sa HROMOTERAPIJOM.

SPA Insulation

To create energy efficient product and to preserve by programmes the selected water temperature with the least losses, we put these features very high on the list of priorities in creating a SPA bath. By filling the same, we get the comfort of using it and we also protect the components built into the bath. By doing this, we need less time and less electric energy for heating the water in our SPA bath. At the same time, we protect our environment and our planet from the effects of heating due to the reduction of energy demanded.

We achieved this by using high quality PU insulation of 10 mm impregnated with resistant layer of AL foil.

For extreme weather conditions and raising energy efficiency to an even higher level, there is an additional option in the form of choosing the same, but this time thicker 30 mm insulation.

SPA IZOLACIJA

Stvoriti energetski efikasan proizvod i očuvati programima izabranu temperaturu vode uz što manje gubitaka smo sebi stavili visoko na listi prioriteta u kreiranju SPA kada. Ispunjnjem iste, dobijamo na komforu korišćenja i zaštiti komponenti ugrađenih u kadu. Pri tome, potrebno nam je manje vremena i manje električne energije za zagrevanje vode u našoj SPA kadi. Samim tim štitimo i našu planetu od efekata zagrevanja usled smanjenja potrebe za energijom.

Ovo smo postigli upotrebom visoko kvalitetne PU izolacije od 10 mm, impregnirane otpornim slojem AL folije. Za ekstremnije vremenske prilike i podizanje energetske efikasnosti na još viši nivo, tu je i dodatna mogućnost u vidu izbora iste, ali ovog puta deblje 30 mm PU izolacije.

12

HDS - High density stiren

SWF - Strong wood frame

13

SPA Coating

Aesthetics with high-use value is a requirement that must be fulfilled when the bath and all its circuits should be protected, or actually shielded. In order to fulfill the previous condition and to make the SPA bath itself an ornament in the space, we use a special coating named "Sinter-wood".

Some of its features, besides the great look, are warmth, resistance to all weather conditions, no need for maintenance, acoustic dam, physical resistance...

SPA Bearing Construction

It is necessary to have a rigid but solid construction that will guarantee years and years of usage. The possibility of moving your SPA bath, if necessary, from one place to another without torsion deformation and spinning, we achieved by carefully constructing the supporting frame and by selecting the material for the same. In addition, it is very important that the supporting frame of our SPA bath does not transmit the sounds of the pumps or electronic components, that is, to avoid the effects of the frame of the resonant box.

- HDS -High density stiren

- SWF - Strong wood frame

The loadable frame made of solid wood cross section 40 by 40 mm and protected by Scandinavian coatings especially resistant to moisture.

SPA NOSIVA KONSTRUKCIJA

Imati rigidno čvrstu konstrukciju koja će garantovati godine i godine upotrebe, je veoma bitno za nas. Mogućnost da našu SPA kadu po potrebi premostimo sa jednog na drugo željeno mesto, a bez torzionih deformacija i izvijanja, postigli smo pažljivim konstruisanjem nosivog rama i odabirom materijala za isti. Dodatno je veoma bitno da nosivi ram naše SPA kade ne prenosi zvukove rada pumpi, niti elektronskih komponenti, tj. da se izbegne efekat „rama rezonantne kutije“.

- HDS -High density stiren

- SWF - snažan drveni ram

Nosivi ram napravljen od punog drveta preseka 40 puta 40 mm zaštićen skandinavskim premazima sa posebnom otpornošću na vlagu.

GREY WOOD
SIVO DRVO

ROSE WOOD
RUŽINO DRVO

SPA OBLOGA

Estetika, uz visoku upotrebnu vrednost, je zahtev koji se mora ispuniti kada kadu i sve njene sklopove treba zaštiti, tj. oklopliti. Da bi ispunili prethodni uslov, a samu SPA kadu učinili ukrasom u prostoru, tu na scenu stupa obloga pod imenom „Sinter Wood“.

Samo neka od njenih svojstava, uz izuzetno lep izgled su toplina, otpornost na sve vremenske prilike, bez potrebe za održavanjem, akustična brana, fizička otpornost...

THERMO
COVERS

14

Thermal covering

In smaller breaks, or when the season of using your bath is finished, your SPA bath should be protected with high quality thermal cover. Our thermal cover provides a quiet "winter sleep" to your SPA bath. It has been made to suit the needs of a high density PU foam, coated with thermal PE foil and in the finishing process, all together in a synthetic leather cover, highly resistant to moisture and all kinds of radiation (UVA, IR, UVB) from the outside environment.

A slight, but not less important detail is, that it is made with vertical edges that are lowered from the middle at a slight angle to the ends for easier drainage.

TERMO POKRIVAČ

U manjim pauzama, ili kada se završi sezona korišćenja, vašu SPA kadu treba zaštiti, i to visoko kvalitetnim termo pokrivačem. Naša termo pokrivka omogućava miran „zimski san“ SPA kade. Ona je izrađena baš po meri, i to od PU pene visoke gustine, obložene termo PE folijom i u završnoj obradi sve skupa u dekorativnoj navlaci od sintetičke kože, visoko otporne na vlagu i sve vrste zračenja (UVA, IR, UVB) iz spoljne sredine.

Sitan, ali ne manje važan detalj je, da je ona izrađena sa strmim ivicama, koje se od sredine pod blagim uglom spuštaju prema krajevima radi lakše drenaže.

Tarpaulin

15

Tarpaulin with thermal cover is an indispensable detail for a quiet winter dream. It is custom made and highly waterproof. It completely rounds up the story of protection.

CIRADA

Cirada uz termo pokrivač, je nezaobilazan detalj za miran „zimski san“. Izrađena po meri, visoko vodootporna. U potpunosti zaokružuje priču o zaštiti.

16

Stairs

Stairs give you easy access without slipping, are available in several colors.

STEPENICE

Stepenice Vam omogućavaju lak pristup bez klizanja, dostune u nekoliko boja.

17

Aromatherapy

Feel free to enjoy your favourite fragrance note. Deep relaxation and complete balance of mind and body with massage together with Aromatherapy on your SPA bath. Flower notes: cedar, citrus, eucalyptus, peach and much more.

AROMATERAPIJA

Potpuno se prepustite uživanju uz izbor Vaše omiljene mirisne note. Duboka relaksacija i potpuni balans duha i tela uz masažu upotpunjenu korišćenjem Aromaterapije na Vašoj SPA kadi. Cvetne note: kedar, citrusi, eukaliptus, breskva i još mnogo toga.

19

Water quality

Cleanwater Blue Bactericide-Algicide is the odorless, easy-to-maintain mineral system for SPA tubs. Gentle to equipment, it won't sting your nose or burn your eyes. Enjoy spa water that is crystal clear, sparkling clean, without chemical smell.

KVALITET VODE

Cleanwater Blue bactericide-algicid je pomoćno hemijsko sredstvo, za zadržavanje bistre, i hemijski potpuno ispravne vode u Vašoj SPA kadi. A koja je zahvaljujući njegovoj upotrebi, bez hemijskog mirisa te prijatna za našu kožu i sluzokožu.

On-line platform 24/7

Control the running of your SPA bath even when you are physically distant from it. Let the bath work through our on-line platform, with the desired temperature, the favourite style of operation of the hydro and aero pump, even though you are hundreds of kilometres away. Let your vacation start at the same time, on arrival, with a carefully filtered, timed play of light and bubbles in the water.

20

ON-LINE PLATFORMA 24/7

Kontrolišite rad Vaše SPA kade čak i kada ste fizički udaljeni od nje. Pustite kada u rad putem naše On-line platforme, sa željenom temperaturom, omiljenim stilom rada hidro i aero pumpi, te svetlosnom igrom i sa udaljenosti merene u stotinama kilometara. Neka Vaš godišnji odmor počne istoga časa, pri dolasku, sa brižljivo filtriranom, tempiranom igrom svetlosti i mehurića ispunjenom vodom.

Service MAX 72h

Whether you enjoy the privacy of your garden, or you are involved in renting beds in tourism, breakdowns happen suddenly and mostly unexpectedly, but the only important thing is to solve them as soon as possible. We are determined to provide you with this service package which will enable the right operation and returning to enjoyment within 72 hours from the moment your report of the malfunction is received. Our repairer will visit you within this period of time, with, if necessary, replacement parts.

SERVIS MAX 72H

Bilo da uživate u privatnosti svoga vrt-a, bavite se izdavanjem ležajeva u turizmu, kvarovi dolaze iznenada i uglavnom nenajavljeni, samo ih treba što pre rešiti. Odlučni smo Vam kroz ovaj servisni paket omogućiti ispravan rad i povratak uživanju u roku od 72h od momenta za primanja Vaše dojave o neispravnosti. Naš serviser će Vas posetiti u ovom vremenskom roku sa, po potrebi, zamenskim delovima.

The inspiration for this kind of model comes by itself and it is everywhere around us. Circle, sequence and duration, just like life itself. Let us enjoy till infinity in the circle of our dear ones!

Inspiracija za jedan ovakav model, dolazi sama, i svuda je oko nas. Krug, sled i trajanje, baš kao sam život. Uživajmo do beskonačnosti, u krugu nama dragih!

FRONT

In this modern, contemporary and fast lifestyle the main idea of Favorit is, by using the optimal proportion of good-quality raw materials and the great ideas in designing and processing, to find a market for the product which would be used and last for two decades.

We are environmentally friendly because we want to leave the clean and healthy environment for the next generations and in that name we offer an exceptional after-sale service support and well-stocked spare parts. And it is a really good feeling to know that more than 70 % of the raw materials used for the production of our products can be recycled.

U vremenu savremenog i brzog načina života ideja vodilja Favorita je optimalnim odnosom kvalitetnih sirovina i ideja u dizajniranju i preradi, na tržištu plasirati produkt koji će, u korišćenju, imati dvodelenijsku upotrebnu vrednost.

Ne zaboravljamo na ekologiju, jer generacijama koje dolaze želimo ostaviti čistu i zdravu životnu sredinu, i u to ime nudimo izuzetnu servisnu – postprodajnu podršku i snabdevenost rezervnim delovima. Dobar je osećaj znati da se više od 70% sirovina korišćenih u izradi naših proizvoda može reciklirati.

NOTES:**GENERAL REMARKS :**

A GENERAL NOTE THAT APPLIES TO ALL COMPONENTS OF THE PRODUCT AND THEREFORE THE PRODUCT ITSELF:

Visually and usable, there may be a mismatch between the actual embedded and the images and features presented in the components - items. This is due to constant improvements and changes with component suppliers.

- All data individually corresponded to the actual description and characteristics at the moment of printing this edition.
- Please, consult your dealer, or be with us on our web platform www.favoritspa.com and inform yourselves about all technical details, current availability etc.
- Please, refer to our price list in detail with all the notes and features in it.

24 h / 7 ON-LINE PLATFORM

- The features can be changed without prior notice and the wi-fi connection is required to operate the same.

SERVIS MAX 72h

- It only applies to the properly described faults in written form, received through our web address www.favoritspa.com
- The timing of the countdown runs from the moment of our written confirmation of the complaint. For example, for applications that arrive after 12 o'clock on a working day, or on a non-working day, the countdown starts on the next day or on the first next working day.
- The service pack of 72 hours is valid for the territories of the following countries: Serbia, Montenegro, Croatia, Bosnia and Herzegovina, Macedonia, Hungary.
- The validity of the service pack from the moment of activation, that is the moment of the purchase, is limited to 36 months.
- This service does not apply to replacement parts, that is, it does not cover their price if the general warranty has expired.
- The service covers two exits of an authorised service at this speed service at the same location, or the bath (by serial bar code) and can not be transferred to another product.

NAPOMENE:**OPŠTE NAPOMENE :**

OPŠTA NAPOMENA KOJA VAŽI ZA SVE SASTAVNE DELOVE PROIZVODA, PA SAMIM TIM I SAMOG PROIZVODA:

Vizuelno i upotrebljivo može doći do nepodudaranja između stvarno ugrađenih i slikama i karakteristikama predstavljenih komponenti-stavki. A ovo iz razloga stalnih unapređenja i promena kod dobavljača komponenti.

- Svi podaci ponaosob u njemu su odgovarali stvarnom opisu i karakteristikama u momentu štampanja ovoga izdanja.
- Molimo da se kod Vašeg prodavca ili direktno kod nas na web platformi www.favoritspa.com rasipitate za sve tehničke detalje, trenutnu raspoloživost i dr.
- Molimo da se podrobno uputite u naš cenovnik sa svim napomenama i karakteristikama u njemu.

24H/7 ON-LINE PLATFORMA

- Karakteristike se mogu menjati bez prethodne najave, te je za rad iste neophodna wi-fi veza.

SERVIS MAX 72h

- Važi samo za ispravno opisane kvarove, i to u pisanoj formi, pristigle putem nase web adrese www.favoritspa.com
- Vreme odbrojavanja teče od momenta naše pisane potvrde o pristigloj reklamaciji (npr. za prijave pristigle nakon 12h radnog dana, ili u neradni dan, odbrojavanje kreće sutradan ili sa prvim narednim radnim danom)
- Servisni paket 72h važi za teritorije sledećih zemalja: Srbija, Crna Gora, Hrvatska, BiH, Makedonija, Mađarska.
- Važenje servisnog paketa od momenta aktivacije, tj kupovine je ograničeno na 36 meseci.
- Ova servisna usluga se ne odnosi na zamenske delove, tj. ne pokriva njihovu cenu ako je opšta garancija istekla.
- Usluga pokriva dva izlazka ovlašćenog servisa u ovom brzom servisnom roku na istu lokaciju ili kadu (po serijskom bar kodu) i ne može se prenositi na drugi proizvod.
